Summary

Web development is something that I love to do and play with it. I know both Front-end and Back-end. But front-end is my strongest skill and because I feel that I have an eye for design and I understand how to make a design that visitors will appreciate

Till now I have completed 10+ projects on different categories and designed themes for Ghost CMS.

Since I know, how a website backend works and how the front-end shows the information from the backend I believe it gives me the advantages of writing quality or structured code.

I also believe and understand that a perfect design speaks about product quality and it makes the users feel trustworthy. So the front-end really matters.

I love to do research on designs and love to implement them via writing code as well.

It's fun!

Experience

Officer, R&D & Lead Developer, Frontend

Inoryum Ltd

Sep 2020 - Present (2 months +)
